- Problem-solving & analytical mindset
- Team work and collaboration
- Time management & meeting SLA

Projects

1. **<u>Database Support & Automation</u> (Oracle SQL/PLSQL)**
   Role: Database Support & SQL Automation
   Duration: [JUN/2022– AUG/2023]

   Description:
   - Created complex **SQL queries and PL/SQL scripts** to automate daily data validation and reconciliation tasks for banking application.
   - Implemented procedures to identify data discrepancies and corrected records using PL/SQL.
   - Coordinated with development teams to deploy database scripts to UAT and Production.
   - Improved accuracy and reduced manual validation effort by **~40%**.

Tools & Technologies: Oracle SQL, PL/SQL, CRM/Helpdesk Support.

2. **<u>Bhandara Urban Bank</u> – Live KYC MODUL**
   Role: Database Support & SQL Automation
   Duration: [AUG/2023 – DEC/2024]

• Assisted in deploying and configuring the **KYC compliance module** within the CBS platform
• Verified customer identity documents and ensured accurate data entry in the live system
• Coordinated with the core banking team to integrate KYC processes with other banking modules
• Tested the KYC workflow to ensure correct functioning before and after go-live.
• Trained users (branch staff) on using the KYC system for onboarding and updating customer records

Training & Knowledge Transfer
Provided **banking system training** to bank employees and branch managers, covering **module functionality, operational workflows, and best practices**. Conducted **hands-on sessions and troubleshooting guidance** to ensure smooth adoption of the new system across branches.

3. **<u>State Transport Co. Op Bank</u>– Demand Module Implementation**
   Role: Database Support & SQL Automation
   Duration: [DEC/2024 - **Present**]

   Description:
   - Implemented the **Demand Module** in the bank's live system.
   - Conducted **UAT (User Acceptance Testing)** to ensure system functionality and correctness.
   - Coordinated with the business and technical teams for module deployment.
   - Performed **data validation, SQL queries, and troubleshooting** during testing phase.
   - Successfully supported the **go-live** of the module.
